Enjoy Sirumalai an Unpolluted Nature's glorious gift, Magnificent summer retreats and an ecological paradise to the tourists

Now a day adventure tourism and trekking in hills have become the most attractive part of a tour programmes in Tamil Nadu. And Sirumalai is one of the magnificent summer retreats and an ecological paradise of Tamil Nadu. If a skilled trekking guide takes a tourist to the Sirumalai hills any one simply would lead a eco friendly life after their returns.

Spent some time and escape from sweltering heat, come and enjoy the nature's glorious gift and enjoy the coolness of Sirumalai. You can hear chirping of birds and buzzing of insects and sometime the place is enveloped in fog.

Special features

- Seeing Meenatchi Amman Temple at 1000 feet elevation
- Seeing Sathaiyar Dam at 1000 feet elevation
- Sitting and enjoying the waterfalls and water holes.
- Breathing fresh air at 1000 feet elevation
- Best hideouts for holidays

Base camp

CRED is an organisation working for the economic development and political empowerment of rural and tribal downtrodden community for the past 2 decades in this region has opened the new gate for their development through this tourism development activity.

Base camp is situated in the foothills of Sirumalai. All the tourists have to come first to this base camp. After a small refreshment and instruction would be given to the tourist regarding the trekking. They would be taken by a trained and skilled guide to the hills. The rough mudded path would give new experience and new exposure to the tourist.

Trekking experience :

- Skilled and experienced guide would lead you.
- They born and brought up in this region and they are well aware of flora and fauna of this entire region.
- The name and colour of the flowers, plants, shrubs and herbs might expose the traditional wisdom of the tribal community.
- They would share their traditional healing system practiced by them learned through their ancestors.
- Hearing chirping of birds would be your new revelation.
- Buzzing of insects may cross you during your trekking.
- If you are lucky even fog might cover you and your body and soul would feel the experience of paradise of earth.

WHAT YOU COULD SEE AND HEAR:

- Tracking the foot prints of the wild animals would be your new experience in the dense jungles.
